CIPtest[®]

HBsAg Rapid Test Card

**Backed by Your Trust in Cipla – The Leaders in Healthcare
Providing Quality and Reliability in Improving Patient Lives**

**Simple, fast, and easy
procedure**

**100% sensitivity
and 99% specificity**

**Ability to detect major
HBsAg mutants**

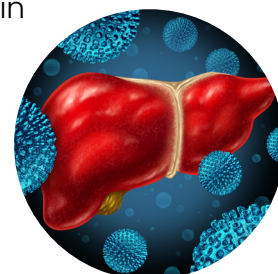

**Ideal for use in a variety
of healthcare settings**

CIPtest HBsAg Rapid Test Card by CIPLA is a immunochromatographic technique designed for professional use to detect hepatitis B surface antigen (HBsAg) in serum, plasma, or whole blood samples.

Estimated
300 million
cases of HBV worldwide¹

Estimated
40 million
cases of HBV in India²

Rapid Antigen Testing for Hepatitis B Virus – A Pressing Need

- Hepatitis B is a major global health problem.
- HBV is 50 to 100 times more infectious than HIV. ¹
- HBV infection causes a wide range of acute and chronic liver diseases, including cirrhosis and hepatocellular carcinoma.
- Early detection of hepatitis B is critical because there are treatments that can lower the risk of developing liver disease and liver cancer. ¹

**Rapid HBsAg testing is designed to aid in the early detection of HBV infection
in patients within 15 minutes.**
