35 million
cases of HIV worldwide²

2.4 million
cases of HIV in India³

Rapid Antigen Testing for HIV – Need of the Hour

- AIDS infection causes progressive failure of the immune system, increasing the body's risk for fatal cancers and infections.⁴
- Individuals diagnosed with HIV virus can begin treatment sooner and take precautions to prevent it from spreading.

Rapid HIV testing can be performed at a point of care and provides results within 30 minutes. No waiting several days for a nucleic acid test (NAT) or lab test.¹
