**C Weighted average Fair Value of Options granted during the year whose -**

Sr. No.	Particulars	ESOS 2013 - A
(a)	Exercise price equals market price	Nil
(b)	Exercise price is greater than market price	Nil
(c)	Exercise price is less than market price	523.32

**Weighted average Exercise price of options granted during the year whose -**

Sr. No.	Particulars	ESOS 2013 - A
(a)	Exercise price equals market price	Nil
(b)	Exercise price is greater than market price	Nil
(c)	Exercise price is less than market price	2.00

**D i) Method and Assumptions used to estimate the fair value of options granted during the year:**

The fair value has been calculated using the Black Scholes Option Pricing model

The Assumptions used in the model are as follows:

Variables	ESOS 2013 - A
1. Risk Free Interest Rate	6.75%
2. Expected Life(in years)	4.39
3. Expected Volatility	24.86%
4. Expected Dividend Yield	0.37%
5. Price of the underlying share in market at the time of the option grant (₹)	533.42

Volatility is the measure of the amount by which a price has fluctuated or is expected to fluctuate during a period. The measure of volatility used in the Black & Scholes pricing model is the annualised standard deviation of the continuously compounded rates of return on the stock over a period of time. For calculating volatility, the daily volatility of the stock prices on the National Stock Exchange, over a period prior to the date of grant, corresponding with the expected life of the options has been considered. The expected life is considered as average of the minimum & maximum life of the options.

There are no market conditions attached to the grant and vest.

**Details related to Trust**

The following details, inter alia, in connection with transactions made by the Trust meant for the purpose of SEBI Regulations:

Sr. No.	Particulars	Details
1	Name of the Trust	Cipla Employee Stock Option Trust
